

Ny läkemedelsförsörjning i Skåne med CLMA

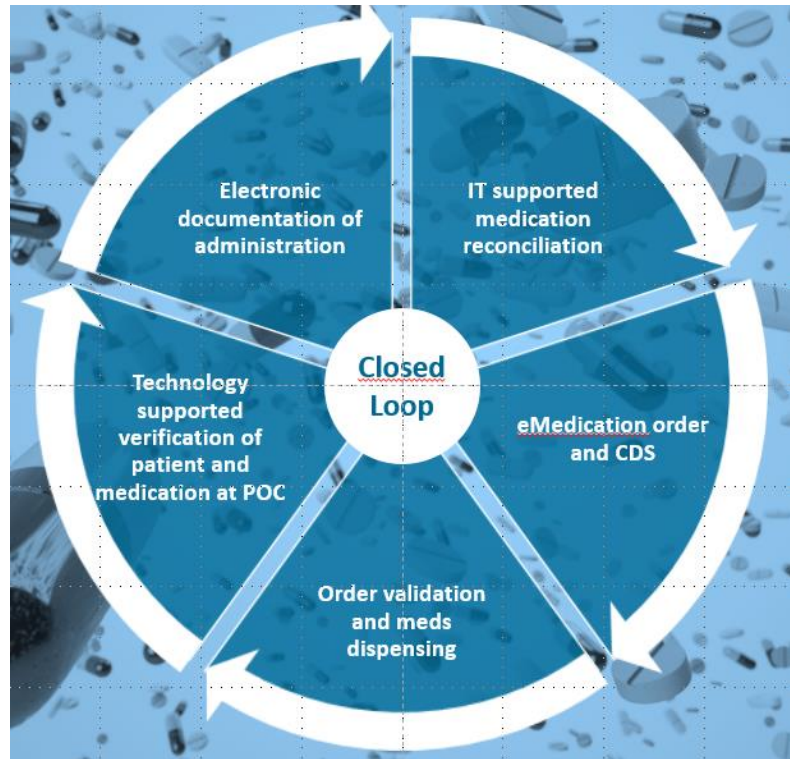

Läkemedelsförsörjningsstrategins huvudkomponenter – förenklad beskrivning

- Läkemedel ska finnas när och där de behövs. Så mycket som möjligt ska finnas färdigt för användning
 - Robust, medveten och känd lagerhållning
 - Spårbarhet och uppföljning
-
- Ny läkemedelsförsörjning med CLMA till Region Skånes sjukvård
 - Utveckling tillsammans med fastigheter och SDV

Märkta primärförpackningar

- CLMA
 - Patientsäkerhet
 - Bedside scanning
 - Sjukhusproducerade beredningar
 - Märkning av primärpackningar
- Produktion
 - Beredningar och vätskevagnsservice
- Uppföljning och analys

EMRAM stage 6

%	Patients attempted to scan at the bedside. (Std: ≥ 50% - no more than fifty (50) percent can be excluded from scanning for inpatients).
%	Medications attempted to scan at the bedside. (Std: ≥ 50% - no more than fifty (50) percent can be excluded from scanning for inpatients).

Present	Absent	
<input type="checkbox"/>	<input type="checkbox"/>	Hospital tour: At the bedside, nurse scans technology-enabled - Patient Wristband
<input type="checkbox"/>	<input type="checkbox"/>	Hospital tour: At the bedside, nurse scans technology-enabled - Medication
<input type="checkbox"/>	<input type="checkbox"/>	Hospital tour: At the bedside, system performs “5 rights” check and failure of any “right” triggers an alert for the nurse interrupting the process.
<input type="checkbox"/>	<input type="checkbox"/>	Hospital tour: Pharmacy: Orders transmitted to pharmacy system for verification / dispensing
<input type="checkbox"/>	<input type="checkbox"/>	Pharmacy: Medication orders are verified before dispensing and first dose. The pharmacy has a 24-hour coverage process or has a process in place to ensure all orders are verified (e.g., auto-verify, timely retrospective review, etc.).
<input type="checkbox"/>	<input type="checkbox"/>	Pharmacy: Medication profiles are automated/managed from transaction updates captured from ordering and medication administration processes.
<input type="checkbox"/>	<input type="checkbox"/>	Pharmacy: Modified orders or recommendations to modify orders are communicated and documented in the EMR.
<input type="checkbox"/>	<input type="checkbox"/>	Pharmacy: An override management process is in place in concert with Nursing reviews and addresses any trends in overrides.
<input type="checkbox"/>	<input type="checkbox"/>	Medication management: Technology is in use and enables an accuracy checking process for supply coming in from the loading/receiving dock area.
<input type="checkbox"/>	<input type="checkbox"/>	Medication management: The packaging process pertaining to those medications the hospital received in bulk and repackages is well defined and supported by some level of automation.
<input type="checkbox"/>	<input type="checkbox"/>	Medication management: Once the medications have been packaged for dispensing, they can be retrieved by the nurse for administration to the patient at the bedside.
<input type="checkbox"/>	<input type="checkbox"/>	Medication management: If ADMs/ADCs are in use, the stocking and storage process of non- ADM/ADC medications is supported by automation.
<input type="checkbox"/>	<input type="checkbox"/>	Medication management: The stocking of the main inventory management system and the use of technology into and out of stock storage is supported by automation.
<input type="checkbox"/>	<input type="checkbox"/>	Medication management: Most medications and IV fluids (e.g., diluents, infusion medications, etc.) are labeled with technology-enabled labels.
<input type="checkbox"/>	<input type="checkbox"/>	Medication management: The organization has a home medication policy, if home meds are allowed to be administered they are both technology enabled and are documented in the eMAR.
<input type="checkbox"/>	<input type="checkbox"/>	Medication management: A process is in place to review and remediate any issues caused by medication mislabeling, wrong bin or other logistical incident.

Upphandling Region Skåne

Krav märkning på primärförpackning

- Ändrade upphandlingstexter:
 - Utgår från Danmark/Norge
 - Anpassning sker utifrån marknaden
 - Uppföljning under avtalstid
 - Ändringsklausul
- Extern remiss
- Erfarenheter
